

SOUTH DAKOTA BOARD OF REGENTS

Policy Manual

SUBJECT: Building Committees

NUMBER: 6:5

The Board will appoint a Building Committee for each capital improvement project at the various schools and institutions in the System. The committee shall be appointed by the President of the Board and shall consist of the Executive Director who shall chair the committee, the president or superintendent of the institution or school, a Regent, and the State Engineer.

- A. The committee shall assume the following responsibilities:
1. The building committee shall interview and select architects for the purpose of developing and designing facilities. Architects may be contracted for two phases: 1) the program plan development, if a formal A/E engagement is deemed necessary for this phase, and 2) the final design of the project. All A/E engagements relative to capital improvements, whether done by the institution, their Foundation, or a related entity, must go through a Building Committee. Any A/E firm that works on a master plan which includes specific designs or floor plans for buildings, in which the A/E firm was not selected by a Building Committee, will not be considered for the final design and development of any project contained in the master plan or preliminary concept development.
 2. The building committee shall review proposed designs to assure their compliance with the requirements of Regents Policy Manual § 6:4.
 3. The building committee shall review proposed project budgets to assure their compliance with the requirements of Regents Policy Manual § 6:4.
 4. The building committee shall direct the state engineer to refer to it for additional review and approval all proposed design modifications that would affect the operating cost, utility or life expectancy of the capital improvement.
 5. The building committee shall direct the state engineer to refer to it for additional review and approval of all proposed design modifications that would significantly affect the project budget.
 6. The building committee shall direct the state engineer to advise it of all developments in the course of construction that might affect the legal rights or liabilities of the Board.

7. The building committee shall report to the full Board any developments that might affect the operating cost, utility or life expectancy of the capital improvement, that might significantly affect the project budget or that might affect the legal rights or liabilities of the Board.
