ACADEMIC AFFAIRS COUNCIL

AGENDA ITEM: 3 – B (4)

DATE: January 26, 2017

******************************************************************************

SUBJECT: Course Modifications – USD

The University of South Dakota has submitted the following course requests listed in Attachment I. These are under review by the System Vice President for Academic Affairs. Upon approval, the proposals will move forward and be reported on the Interim Actions report for the March Board meeting.

Please note that with these new curriculum requests summary forms, once Dr. Turman has reviewed, signed and returned these to each campus, any request that was denied will be followed up by additional correspondence from Dr. Turman noting the associated discrepancies for each. Once these are addressed by the campus, the revised curriculum requests are to be reposted to the institution’s website and a new curriculum summary form submitted to the BOR office with links to the revised requests (only those that were previously denied will need to be listed – all approved requests by Dr. Turman will immediately be moved on to Trudy Zalud to be entered into Colleague).

******************************************************************************

RECOMMENDED ACTION

Approve and move forward upon final review and approval by the System Vice President for Academic Affairs.
Institutional representatives should provide direct links to PDF documents for each of the curriculum requests represented below. All requests should be posted on the campus Curriculum and Instruction website one week prior to the Academic Affairs Council meeting where the curriculum request is being considered.

### Revisions to General Education Course

N/A

Courses referenced above for approval have been reviewed by the Academic Affairs Council and the System Vice President for Academic Affairs and may be advanced forward for entry in Colleague. For those courses listed above that did not receive approval, additional clarification or justification will be necessary and should be re-routed through the curriculum review process on a separate “Institutional Curriculum Requests” form once all issues have been resolved.

**Course Description**

This course focuses on the physical remains of human beings in medico-legal contexts. Students will learn how to identify all parts of the human skeleton, assess human remains to estimate or determine age, sex, stature, and investigate how disease, trauma, and behavioral patterns can leave identifying markers on bones. Discussion topics include recent application of forensic anthropology in specific investigative cases, including international human rights work.

*Provide explanation of differences between proposed course and existing system catalog courses below*

In forensic anthropology we examine only human remains (the human skeleton, decomposition, identification, types of trauma, etc.) within a criminal context; and in forensic science we cover the fundamentals of criminal investigation from the role of the first responder at a crime scene to the identification of physical evidence to the more recent computer and mobile phone forensics. The Human and Animal Osteology course is focused on the broader skeletal biology of mammals, as well as the taphonomic factors that impact preservation at archaeological sites.

Section 3. Other Course Information

3.1. Are there instructional staffing impacts?

X No. Schedule Management, explain: Course has been scheduled as 392 Topics in the past and will continue in rotation with current faculty.

**Course Description**

The purpose of this 4 week course is to integrate medical students into an interdisciplinary healthcare team that serves health professional shortage areas. The medical students' attending physician will oversee the administration of this care, serving as a role model of how to interact with other disciplines. This experience will enlighten medical students on other disciplines' roles within healthcare and how they can coordinate care with these disciplines to ensure better patient outcomes.

Provide explanation of differences between proposed course and existing system catalog courses below

**PAST 758: Rural Underserved Family Med:** PAST 758 may be similar in name but it is not suitable for our needs; its focus is on refining skills for a Physician Assistant as opposed to a Medical Student. FAMP 857 will focus on educating medical students how to work within an interdisciplinary healthcare team in a rural setting. It will have an MD program restriction.

**PUBH 740: Rural Health Policy/Education:** PUBH 740 is not similar to our proposed FAMP 857 course because our course focuses on inter-professional education while in a rural clinic setting. PUBH-740 is a classroom, theory based course.

Provide explanation of differences between proposed course and existing system catalog courses below

The proposed course falls under the general purview of “Aesthetics” but is narrower in scope (one particular theme, tragedy, under one topic, poetics). Thus the course title “Aesthetics” and the catalog description are not apposite for the curriculum for “Philosophy and Tragedy”

The proposed curriculum includes several of Shakespeare’s tragedies but is different than the Shakespeare class in two ways: (i) tragedies are not limited to Shakespeare (e.g., readings include Sophocles, Euripides, Ibsen), and (ii) the tragedies are approached in a distinctive way, namely, by reading them in the context of the way the dramas figure in the work of philosophers (e.g., read Hamlet with an eye to evaluating why it figures prominently in the works of Hegel, Nietzsche, Freud).

Good afternoon all,

If a consensus can happen on the final description then THEA can be added to this existing form; the THEA cross-list/equate can be on the same new course form to avoid future paperwork. It sounds like the Graduate Council was open to adding THEA to the form if they got a blessing and worked out the description hiccup and then the form would be approved and continue processing and not need to be reviewed again in the future or held until the next meeting.

Good morning Provosts,

The Math Discipline Council has been working together to revise the pre-requisites of the common courses: Math 102, MATH 103, and MATH 104. (Please see attached forms.) Dr. Van Peursem, the chair of the Math Discipline Council, agreed to take the lead to coordinate these curriculum revisions through USD. These will be vetted in our curriculum committee next week.

Do you support these revisions to align the pre-requisites?

I like the uniformity that is proposed. I think the first option is preferable as we will be going back to math 021/101 as the primary delivery model for remedial math. I know it should be clear with the (math 095 or math 101), but I like the bluntness of “Math 095; or Math 101...” instead of “one math course” especially in regards to offering math 021 in the fall.

Best wishes over the Thanksgiving holiday,

Rich
Hi Folks,

Since 102, 103 and 104 are lumped together with our placement for the math index, it seems we may want to have the same pre-req’s on those courses as well. I’m happy to initiate the paperwork on our campus but wanted to see if you all concur or would support it. This was brought to the forefront as we are seeing more students go from 095 to 104 and having problems registering. Let me know what you think of the following change. I am providing 2 options on the proposed change as I reworded the current 102 and 103 language slightly as 095 is RS/RU grading and not letter graded. We could even just use that language as is since it apparently doesn’t cause any issues. Let me know what you think. Thanks.

Dan

Current Pre-Req’s

104: “One math course (at the 100/200 level) or appropriate placement based on standardized testing.”

102 and 103: “One math course (MATH 095 or 101) with a grade of C or better or appropriate placement based on standardized testing.”

Consider changed Pre-Req’s

102, 103, 104: “MATH 095; or MATH 101 with a grade of C or better; or appropriate placement based on standardized testing.”

Or

102, 103, and 104: “One math course (MATH 095 or 101) with a grade of C or better or appropriate placement based on standardized testing.”

Course Description

This course is designed to provide the liberal arts student with practical number theory, logical thinking, and mathematical skills to be quantitatively literate. The student will develop critical thinking skills, interpret data, and reason quantitatively to solve authentic problems and increase confidence with mathematics while simultaneously building a cultural appreciation for the relevant and meaningful role that mathematics plays in many areas of life. Students will use information and knowledge from multiple areas to apply mathematics to new situations and dynamic processes.

Pre-requisites

One math course (MATH 095 or 101) with a grade of C or better or appropriate placement based on standardized testing.

Registration Restrictions N/A
