1. Policy Overview & Background

During the merge of the six university databases (2003), a common Regental transcript was developed. This unified approach compelled system-level review, consideration, and approval of university-specific transcript comments. The Academic Affairs Council was identified as the logical entity to authorize usage of such comments. Any university interested in creating a new comment must submit a formal request, including rationale and intended use. Any university interest in creating a new comment must submit a formal request, including rationale and intended use. The System Vice-President for Academic Affairs will coordinate the evaluation process and then apprise the impacted university of deliberative outcomes.

2. Transcript Designations

2.1. Black Hills State University
