Enrollment Book: SDSU 2017

Prepared by the SDBOR Office of Academic and Research Affairs, this report provides a compendium of data describing recent enrollment trends at South Dakota State University.¹ Identical reports are generated for each regental university, and are intended to serve as a resource for campus officials for planning and analysis purposes. Supplemental interactive data are available from the [SDBOR Fall Enrollment Dashboard](#) on the Board of Regents website.

University Summary

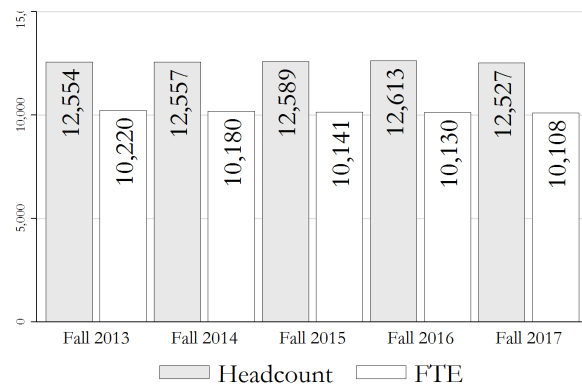

In Fall 2017, SDSU reported a total headcount enrollment of 12,527 and a total full-time equivalent (FTE) enrollment of 10,108. Table 1 and Figure 1 show basic headcount and FTE figures for SDSU over time.²

¹All data for this report are sourced from Regents Information Systems fall term census date extracts. Questions about this report should be directed to Daniel Palmer at danp@sdbor.edu.

²Throughout this report, FTE values are rounded to the nearest 1.0. However, “Change” indicators refer to original unrounded values.

Enrollment by Student Characteristic

Table 2a splits SDSU’s unduplicated headcount totals into two categories: (1) students taking at least one on-campus course from SDSU, and (2) students taking off-campus courses from SDSU only. Students taking a combination of on-campus and off-campus courses from SDSU are included in the “On” category. Note that students reported in the “Off” category may have taken on-campus courses from other universities.

Table 2b displays the SDSU FTE generated - at any location - by the students tabulated above. For example, the FTE shown in the “On” column below reflect all SDSU credits taken by students in the “On” column in the table above. These FTE may have been generated either on-campus or off-campus from SDSU.

Enrollment by Student Characteristic (cont.)

Table 3a shows SDSU headcount data by degree-seeking status (at SDSU). Note that students listed in the “nDS” (not degree-seeking) column may have been degree-seeking at other universities.

Enrollment by Student Characteristic (cont.)

Table 4a combines the previous two characteristics (*student enrollment type* and *degree-seeking status*) into one cross-tabulation of SDSU headcount. Again, students reported in the “Off” categories may have taken on-campus courses from other universities. Likewise, students listed in the “nDS” columns may have been degree-seeking at other universities

Table 5a segments SDSU’s total headcount by resident status. Students in the “Resi” column are considered South Dakota residents for tuition purposes, while students in the “nResi” column are considered out-of-state students for tuition purposes.

Table 5a
SDSU Headcount by Resident Status

Table 6a provides headcount trends for three undergraduate student subgroups: first-time undergraduates, transferred-in undergraduates, and high school students. Note that these classifications are not exhaustive, meaning that the columns will not sum to 100 percent of the “All UGs” column (which shows the total population of undergraduates at SDSU.)

Detailed Enrollment by Location³

Table 7a provides an alternative representation of SDSU headcount by location. In this table, students are duplicated by course location when applicable. For example, a student taking both an on-campus course from SDSU and an off-campus course from SDSU will be included in each respective column below. However, the “All” column continues to show unduplicated headcount. As a result, percentage columns show each subgroup’s proportion of the total student population; these proportions will not sum to 100.0 percent.

Table 7a
SDSU Headcount by Course Location

Term	All	On	Off	Pct On	Pct Off
Fall 2013	12,554	9,864	5,485	78.6%	43.7%

Table 7b displays the SDSU FTE generated by course location. For example, FTE reported in the “On” column below refer to all SDSU FTE generated through on-campus courses delivered by SDSU . *This approach contrasts with previous FTE tables, which reported the total FTE generated by students per classification.*

Detailed Enrollment by Location (cont.)

Table 8a displays SDSU students enrolled at other regental institutions. The “Other Any” column shows the number of SDSU students enrolling at other universities at any location, and the “Other On” and “Other Off” columns tally enrollments in on-campus and off-campus courses (at other universities), respectively. Students are duplicated by course location when applicable, except in the “SDSU” column, which is unduplicated.

As above, Table 8b shows FTE generated by course location. For example, the “On” column shows FTE generated (by SDSU students) in on-campus courses at other universities. “Ratio” columns depict FTE generated at other universities in relation to FTE generated at SDSU. So, these columns indicate the ratio - for students taking at least one course at SDSU - between FTE generated at other universities and FTE generated at SDSU.

Detailed Enrollment by Location (cont.)

Table 16a shows counts of SDSU students who took at least one course by distance.⁴ For comparison, the “SDSU” column shows total headcount at SDSU. The “Dist Any” column tallies students enrolling in any distance course, while the “Dist Univ” and “Dist Other” columns show students enrolling in distance courses offered by SDSU and other regental universities, respectively. Below, Table 16b shows FTE earned by SDSU students in various distance categories in comparison with FTE earned from all courses delivered by SDSU.
