**SUBJECT: Dual Credit – Reduced Tuition Program – Summer 2016 Grade Report & Fall 2016 Enrollment Report**

**Summer 2016 Grades**

The BOR office received performance data from the Summer 2016 semester for students participating in the High School Dual Credit Program (See Figure 1). Data showed that 90% of HSDC students in the Regental System finished with a grade of C or higher, which is a 2% increase from the Summer 2015 semester. 9% of students finished with grades of D or F, which was a 3% increase from Summer 2015, and 1% of students withdrew from courses, which was a 2% decrease. While have seen these rates remain stable since the beginning of the program, this is an overall improvement on Summer semester grades, which are best compared to each other when considering the more compact courses for the Summer semesters. (See Table 1).

**Spring 2016 Enrollment**

The enrollment process for Fall 2016 opened in April, and students were able to register apply until the first day of classes, and add courses until the end of the third day. The numbers below were taken after the census date, so students who dropped courses are not included in these numbers. 1,743 individual students have enrolled in 2,590 courses (See Figures 2 & 3). Those students are taking 7,613 credits through BOR institutions. Since the previous Fall semester in 2015, our headcount has gone up by 13.4%, and our course enrollments have gone up 16.1%. Table 2 depicts the top twenty courses by enrollment in the program for Spring 2016, and also breaks down enrollments by online and face-to-face enrollments for each campus.
