

Dear Friends:

South Dakota's system of statewide educational institutions must be accountable to the people of this great state—and rightly so. South Dakotans have invested resources—both human and financial—in eight educational institutions with missions to serve all of the citizens of this state. They have entrusted the oversight of these institutions to the Board of Regents.

I think that I speak for all of the Regents when I say that serving as a member of the Board has been a satisfying experience. Some years ago we adopted nine state policy goals for these statewide institutions. Embedded within those goals is our vision of a system that manages resources wisely, delivers education effectively, and provides access widely. Disparate initiatives are now coming together to form a cohesive whole.

A number of major changes have occurred in recent years as a result of these initiatives. These include:

- The implementation of the new university funding framework, which includes performance-based incentive funding. As the universities strive to achieve measurable targets they are accomplishing state policy goals.
- The second year of a salary competitiveness plan. Distributing salary increases on the basis of individual performance, market considerations, and institutional priorities has closed the gap between South Dakota schools and universities and their peer institutions.
- The focusing of the university general education curriculum. Working together the universities identified goals, set course criteria, and determined credit hours for the purpose of strengthening the undergraduate educational experience.
- The adaptation to technology for teaching. Funding was made available for a second year of the Governor Janklow's Faculty Awards for Teaching with Technology and another summer of the Technology for Teaching and Learning academies. In addition, the universities and the elementary and secondary education community are sharing a federal grant to make technology a component of professional development.

Even though we have made significant strides toward achieving our goals, we know that more remains. This next year we anticipate the implementation of a standardized placement examination administered to all entering freshmen. Applying national norms to the performance of new students will ensure that they are placed in the appropriate courses when they begin their study. Further, we are encouraging the universities to find ways to address the professional needs of the K-12 schools.

Over the past several years, we have found Governor William J. Janklow, legislators, faculty, students, and citizens willing to devote their time to meet with us to discuss South Dakota's educational needs. The roundtable structure has afforded us an opportunity to identify issues, share ideas, and develop plans. We are grateful for the participation of South Dakotans in this very important educational process. In appreciation for that support and interest, I offer this publication, accounting for the Regents' management of the system over the past year. Together we can move our statewide institutions forward and achieve our goals.

## **A Message from the Executive Director**

**Robert T. Tad Perry**

The South Dakota Board of Regents has determined that Regental institutions will demonstrate quality in teaching and research. They will wisely manage resources provided by the state's citizens. Finally, they will cooperate and collaborate as they strive to serve the people of this state.

In December 1997, the Board of Regents adopted nine state policy goals for higher education in South Dakota. The goals create a structure within which the Regents have framed subsequent initiatives. By their nature the goals have also established a means of accountability. The goals enable us to measure achievement and to report performance.

The Fiscal Year 2000 *Fact Book* is once again organized around the policy goals for South Dakota:

- Access for all qualified South Dakotans
- Enrollment in economic growth programs
- Improvement in academic performance
- Attraction and retention of qualified professionals
- Development of faculty professionals
- Collaboration among the universities
- Enhancement of current technology infrastructure
- Maintenance of current facilities and equipment
- Generation of external funds

As an indication of the commitment the Regents have made to public accountability, five of the nine goals are tied to specific annual targets. Each university's performance toward achievement of those targets determines whether it earns money from a pool to which it has contributed. In FY99 four of the six universities earned back their contributions.

Further, the Regents have implemented a compensation plan designed to reward faculty and non-faculty exempt employees on the basis of individual performance, market demands, and institutional priorities, as it strives to attract and retain the best personnel for the Regental institutions. FY99 marked the first year of this plan.

Finally, thanks in large part to Governor Janklow, the Legislature, and the Reinvestment Through Efficiencies program, the Regents have been able to make substantial investments in technology hardware, software, training and support.

Three fourths of all those enrolled in higher education in South Dakota have selected a Regental university. We trust that the accounting of performance set forth in this *Fact Book* justifies their confidence and contributes to the continuing discussion of higher education in South Dakota.

### Institutional Missions

Admissions Requirements	39
-------------------------	----

## Goals 1, 2, and 3

*Goal 1—Access for All Qualified South Dakotans: All qualified residents will have convenient and affordable access to higher education.*

*Goal 2—Enrollment in Economic Growth Programs: The universities will increase enrollments in selected programs within their respective missions that are of particular importance to the state's economy in order to graduate students who can contribute to the development and expansion of the state's economy.*

*Goal 3—Academic Improvement: The academic programs offered by universities will be of high quality and the universities will regularly provide evidence of quality based on measures of their students and graduates.*

When the nine state policy goals were formulated, the students were the first concern of the Regents. Goals 1, 2, and 3 are directed toward ensuring that South Dakota and its students have available to them a first-rate higher education system. That system should reach as many residents as possible with programs that have a future for the graduates and for the state. That system should also demonstrate that it has added value to the knowledge and skills of its students. Performance toward these three goals is rewarded through incentive funding.

### Historical Fall Headcount Enrollment Census Date

Year	BHSU	DSU	NSU	SDSMT	SDSU	USD	Fall Total	Percent Change

Under the funding framework, adapted in FY98 revenues are distributed to the universities as base funding accompanied by targeted investments and incentives for demonstrated improvement. As a result of this change, separating students enrolled in state-supported courses from those who enroll in self-support courses is no longer necessary. Beginning in the fall of 1998, the Regents have reported all enrollment as of the census date which is the tenth class day in the semester. In order to provide a historical perspective on total enrollment, historical fall headcount enrollment and historical fall FTE enrollment tables have been recalculated to reflect total enrollment on census date in past years.

### Historical Fall Full-time Equivalent Enrollment Census Date

Year	BHSU	DSU	NSU	SDSMT	SDSU	USD	Fall Total	Percent Change

Source: Regents Information Systems

In past years, the Board of Regents has reported both fall headcount and fall FTE enrollments as state-support only. Prior to fall 1992, not all campuses reported self-support course enrollment. Consequently, self-support enrollment information is not uniformly available for those years. Beginning in fall 1992, all campuses were brought into compliance with Board policy on reporting. The historical fall headcount enrollment and the historical fall FTE enrollment tables contained in this edition of the Fact Book reflect the total enrollment on census date for years in which the data are available. All FTEs are based on 15 credit hours for undergraduates, 12 credit hours for master’s and doctor’s degrees, 15 credit hours for Law and 19 credit hours for Medicine. FTE totals may not be exact due to rounding.

### First-time, Full-time, Baccalaureate-Degree Seeking Undergraduates 1992 Fall Cohort

	BHSU	DSU	NSU*	SDSMT	SDSU*	USD	System
Initial Cohort	903	193	530	370	1,457	1,200	4,653
Completed a 2- or 3-year program	12	-	-	-	-	20	32

Completed in 6 years	37	7	23	26	88	56	237
Noncompleters still enrolled in FY98	159	7	16	11	20	40	253
Noncompleters not enrolled in FY98	327	121	341	236	648	611	2,284

Source: IPEDS Graduation Rate Survey, March 1, 1999.

\*Numbers do not equal initial cohort due to missing data.

Federal legislation requires that higher education institutions track entering cohorts of freshmen and report graduation and persistence rates. Federal legislation defines a full-time student as one enrolled for at least 12 credit hours. This differs from the 15 credit hours used by the Regents to define a full-time student for the purposes of computing full-time equivalency. A student who enrolls in 12 credit hours per term cannot complete the requirements for a baccalaureate degree in eight terms. Once in a cohort a student remains in it even if the student enrolls for less than 12 hours or drops out of school. Universities are permitted to remove students for a limited number of reasons, such as death or enlistment in the armed services.

Residents of every county in South Dakota attend regional universities. This table displays the total number of students from each county who are enrolled in the universities of South Dakota Public Higher Education. State support represents general funds appropriated per headcount enrollment for the six universities and the medical school. It does not include appropriations for AES, CES, ADRDL and system operations. General funds per headcount appropriated for FY99 equal \$3,688.

### Proficiency Exams

Source: Board of Regents & American College Testing Inc.

Beginning with Spring 1998 all rising juniors have been required to take the Collegiate Assessment of Academic Proficiency (CAAP).

A total of 1,963 students were required to sit for the exam for the first time in Spring 1999.

Exam results were compared to the national norms. In all four testing areas (writing, mathematics, reading and science reasoning), South Dakota students tested higher than the national norms.

The results of the CAAP improvement report do not compare institutions, but rather compare students who have similar initial ACT scores. To arrive at percentage gains in achievement by South Dakota students, the ACT scores of entering freshmen at each South Dakota university are compared to their scores on CAAP. The percentage gains in achievement by South Dakota students are then compared to gains by students with similar ACT scores attending other universities.

### Advanced Placement Exams

The Advanced Placement (AP) program administered by the College Board offers high school students a chance to study courses that are equivalent to first-year college courses. Following instruction in special AP classes, in honors classes, or in extra independent study, the students can take examinations that demonstrate

Source: The College Board

that they have obtained the knowledge and skills of comparable college courses. When those students later enroll in a college or university that accepts AP credit, they can present their AP scores. Currently all South Dakota public universities award credit for acceptable exam scores.

The chart to the left shows the number of high school students taking AP exams and the number of exams taken in 1994 through 1999.

### Actual and Projected Number of High School Graduates 1990 - 2003

## Enrollment in Economic Growth Programs Fall 1998 Headcount

State Higher Education Policy Goal 2 calls for increased enrollments in programs that will continue the economic growth of South Dakota. Universities will be rewarded for the growth in enrollments in the programs as part of state policy incentive funding (see page 34).

\* SOURCE: FY99 Board of Regents Regional Tuition Surveys

NOTE: Total Cost includes tuition and fees and room and board. The averages include both colleges and universities and are weighted. The cost was calculated using 32 hours for an undergraduate and 24 hours for a graduate student. Room rates were based on a double occupancy room and board rates were based on the meal provided that provided 15 meals per week or the next closest plan.

The South Dakota School for the Deaf and the South Dakota School for the Blind and Visually Impaired have the expertise and resources to meet the special learning needs of students with vision or hearing loss. Services are provided to parents and local school districts throughout the state at no charge because of a general fund appropriation. This provides the flexibility to serve young children at home and students in public schools as well as students who are enrolled on campus. The table provides the number of children served by the School for the Deaf and School for the Blind and Visually Impaired from each county.

## Goals 4 and 5

*Goal 4—Human Resources: The universities will attract and retain highly qualified professionals needed to carry out their teaching, service, and research missions.*

*Goal 5—Faculty Professional Development: The universities will provide faculty with the professional development opportunities, time, and resources needed to remain current in their disciplines, and to redesign courses in order to integrate current technologies.*

The worth of an education provided by any institution depends largely on the caliber of the professionals who provide that instruction. The Regents have set two goals that acknowledge the importance of faculty and staff in building and maintaining quality institutions. They recognize that it is the people with the knowledge and skills they possess that bring distinction to any institution.

### EPSCoR in South Dakota

South Dakota State University, the South Dakota School of Mines and Technology, and the University of South Dakota participate in EPSCoR, the Experimental Program to Stimulate Competitive Research, sponsored by the National Science Foundation (NSF). South Dakota has participated in the program since 1989 when it received a grant from NSF that was matched with a grant from the South Dakota Future Fund. EPSCoR is designed to assist states that historically have received less federal research funding. The NSF believes universities are valuable resources in a state's development and that stimulating university research supports economic growth.

#### South Dakota EPSCoR Facts

Changes in Total Competitive NSF Awards, 1993-98	38%
Total NSF Funding, FY98	\$7 million
Total NSF Funding Per Capita, FY98	\$10
Change in Total NSF Funding, 1990-98	253%
Total EPSCoR Investment (NSF and state funds) 1989-99	\$26.9 million

## Goals 6 and 7

*Goal 6—Collaboration: The universities will work collaboratively to carry out their teaching, service, and research missions.*

*Goal 7—Current Technology Infrastructure: The universities will develop and maintain technology infrastructures that can provide current instruction, prepare students for their future workplaces, enhance productivity, and deliver instruction between campuses and to off-campus students.*

Goals 6 and 7 are directed toward the wise management of public resources. Because South Dakota is a large state with a small population, collaboration among six diverse universities is encouraged by the Regents for the purpose of bringing as many educational options to as many people as possible. One way to accomplish this is to use technology to deliver instruction available not only to students attending the six universities but also to high school students and residents in off-campus sites throughout the state. The Regents believe that an integral part of education is to prepare students for their place in the world in which they will live and work. Because technology will be a part of that world, it must be a part of their learning experience as well. It is a tool that the Regental system must provide. Performance toward Goal 6 is rewarded through incentive funding.

---

## Universities Serving High School Students

Many high school students are capable of university-level academic work. Completing courses while still in high school may allow students to complete their degree sooner and thus reduce the cost of higher education. For many high school students, a university course may be the most efficient use of their time. The enrollment of high school students in university courses is rewarded through Goal 6.

### High School Students Enrolled in College Level Courses

Fall Terms, 1996-1999

#### Number of High School Students Enrolled

	BHSU	DSU	NSU	SDSMT	SDSU	USD	System
1999	40	55	348	8	74	110	635
1998	37	35	116	4	35	124	351
1997	22	26	6	8	45	71	178
1996	30	11	7	9	42	45	144

#### Percent of System Total High School Students

	BHSU	DSU	NSU	SDSMT	SDSU	USD
1999	6%	9%	55%	1%	12%	17%
1998	11%	10%	33%	1%	10%	35%
1997	12%	15%	3%	4%	25%	40%
1996	21%	8%	5%	6%	29%	31%

Source: Regents Information Systems

The school district, not the university, makes the decision to award credit toward a high school diploma (SDCL 13-28-37). The universities may not know whether a student has had a course approved for high school credit. The above table provides high school student enrollments for four recent fall terms and each university's percentage of the total number high school students enrolled across the system.

## Governor Janklow's Faculty Awards for Teaching With Technology

In January 1998 Governor Janklow recognized the importance of faculty professional development and created the Faculty Awards for Teaching with Technology to give faculty time and resources for redesigning courses to integrate applications of technology into their disciplines. Each award recipient received compensation, while redesigning the course during the summer, and support funds that could be used for travel, training, equipment, and software associated with the project. A total of 57 faculty members received the technology grants in 1998 and 71 faculty members received grants in 1999. The names and project titles of the 1999 recipients are listed below.

### Student Computers Spring 1999

	Computers	Student FTE Fall 1999	Student/Computer Ratio
BHSU	198	2,920	14.7
DSU	303	1,335	4.4
NSU	487	2,299	4.7
SDSMT	195	1,873	9.6
SDSU	512	7,339	14.3
USD	410	5,843	14.3
Totals	2,105	21,609	10.3

*Students are Fall 1999 FTE. Student computers include those in classrooms, laboratories, computer labs, and in the library (except those assigned to library employees). Computer numbers do not reflect purchases since the data were collected in Spring 1999. Includes Pentium, McIntosh G3 and others.*

### Technology Classrooms Spring 1999

	BHSU	DSU	NSU	SDSMT	SDSU	USD	Total
Presentation (1)	7	2	16	2	36	13	76
Computer-Based (2)	5	4	13	5	16	4	47
Distance Education (3)	0	0	0	0	4	5	9
Presentation & Computer-Based	6	5	9	0	0	5	25
Presentation1 & Distance education	1	1	2	1	0	0	5
All 3 - Governor's Electronic Classrooms	1	1	1	1	1	1	6

Source: University reports, Spring 1999.

*1. A presentation classroom allows the instructor to use a variety of materials and to control the presentation devices.*

*2. A computer-based class room is equipped to provide for instruction using computers during the lecture or laboratory session.*

*3. A distance education classroom is equipped to communicate with one or more remote sites.*

*Note: Rooms were counted only if the equipment was installed in the room. Some rooms have connections that allow the use of portable equipment for presentations, distance education, etc. Classrooms do not include those equipped after the data were collected in Spring 1999.*

## Goal 8

*Goal 8—Current Facilities and Equipment: The universities will maintain and replace their facility and equipment infrastructures as needed in order to provide safe, effective, and current education and service to the State.*

Wise resource management includes protection of assets. The people of South Dakota have generously invested in the physical plant of the universities. The Regents have set an annual minimum target of maintenance and repair at one percent of replacement value.

In addition to information on the physical plant, this section also contains information on historic construction or improvement of selected buildings, and self-liquidating projects through the end of FY99.

### Academic Buildings Initial Cost/Replacement Value

	Gross Area in Sq Ft	Initial Cost	Replacement Value
BHSU	477,252	\$ 14,672,023	\$ 36,566,408.0
DSU	245,825	4,707,819	24,971,374

\*Figures exclude Simpson/French, Girls Dorm, and Old School Buildings

### Historic M&R Allocation

	FY92	FY93	FY94	FY95	FY96	FY97	FY98	FY99	FY00	FY01
Allocation in Millions	\$1.7	\$2.1	\$2.9	\$3.7	\$4.8	\$4.8	\$5.0	\$5.1	\$5.3	5.5
% Increase Since FY92	-	26%	77%	123%	188%	190%	201%	210%	219%	221%

Note: M&R Allocation includes the annual HEFF allocation in addition to the M&R Fee component of the University Support Fee. FY01 is estimated on a 4% increase to the HEFF allocation and constant M&R fees.

### Dormitory Utilization

#### Fall 1999

	Designed Capacity	Planned Capacity	Current Occupancy	% Occupied of Planned Capacity
BHSU	684	699	699	100.0%
DSU	630	620	609	98.2%
NSU	930	920	741	80.5%
SDSMT	571	534	513	96.1%
SDSU	3,462	3,327	3,015	90.6%
USD	2,261	2,075	1,726	83.2%
Total	8,538	8,175	7,303	89.3%

1. Designed Capacity is the capacity for which the buildings were originally designed. Married Student Housing and Campus Apartments are only reflected with a Designed Capacity of one student.
2. Planned Capacity includes design changes and administrative decisions such as using double rooms as single or triple rooms.

## Goal 9

*Goal 9—External Funds: The universities will increase non-state financial support.*

The Regents recognize that, as demands on the state's general funds increase and the cost of operating universities also climbs, other sources of revenues must be found. These kinds of revenues include endowments, which are established funds provided to the foundation affiliated with each university. Other sources are grants and contracts with the federal or local government, private foundations, corporations, and individuals for the performance of certain services or functions. Foundations, private individuals, and corporations also provide money for scholarships. Capital fund drives raise funds used to maintain, repair, renovate and construct campus buildings, purchase equipment, and acquire real estate. Performance toward Goal 9 is rewarded through incentive funding.

### Base Budgets and State Policy Incentive Funding

As a part of the new funding framework the Regents have designated that base budgets are determined for each university to promote multi-year planning. The base budgets receive adjustments for inflation as appropriated by the Legislature. In addition, an amount equal to five percent of the universities' tuition and general funds (after reinvestment and salary competitiveness) will be distributed through incentive funds. Each university competes against itself to improve its performance in areas important to South Dakota public higher education. The Regents have set targets for the universities in five of the nine state policy goals. If a university achieves its target in a particular incentive, it receives resources from that incentive fund. The incentive funds and their targets for FY99 are displayed below.

#### State Policy Incentive Funds Baselines & Targets Approved by the Board

Incentive Fund	BHSU	DSU	NSU	SDSMT	SDSU	USD
<b><u>1. Access for Residents</u></b>						
Base: Fall 1998 FTE	2,359.40	939.1	1876.1	1,312.90	5,461.40	4,307.80
FY00 Target: % Change	3.50%	6.00%	2.00%	2.00%	2.00%	2.00%

### Actual Expenditure Per Student FTE FY94-99

### Tuition and General Fund: Percentage of Student Support FY99

**Black Hills State University - Thomas Flickema, President**

The role of Black Hills State University is that of a liberal arts university providing programs in the liberal arts and sciences; education with special emphasis on the preparation of elementary, middle level, and secondary teachers; human services; wellness; business, travel industries management and tourism. Complementing these programs is a series of pre-professional, one and two-year, terminal, and junior college programs. Degrees are authorized at the associate, baccalaureate, and master's levels.

**Dakota State University - Jerald Tunheim, President**

Dakota State University is an institution specializing in programs in computer management, computer information systems, and other related undergraduate and graduate programs as outlined in SDCL §13-59-2.2. A special emphasis is the preparation of elementary and secondary teachers with expertise in the use of technology and information processing in the teaching and learning process. A secondary purpose is to offer two-year and one-year programs and short courses for application and operator training in areas authorized.

**Northern State University - John Hilpert, President**

Northern State University is a multi-purpose, regional institution of higher education. Founded as a normal and industrial school to serve the northern part of the state, the University has diversified its offerings to address the emerging needs of the students, community, and region. Teacher preparation remains an important feature of the institutional mission, as do programs in the arts and sciences, business, and fine arts. Through undergraduate and graduate programs, the University provides quality teaching and learning. Offering students a breadth and depth in the liberal arts and in professional studies, the University develops effective and productive professionals and citizens. Further, the University creates and nurtures a community of students, faculty, and staff, supporting communication, student and faculty research, and professional growth. Northern State University has designed programs to meet academic, social, cultural, and economic needs of the community and area, providing lifelong learning opportunities, a center for the arts and recreation, and support for regional development.

**South Dakota School of Mines and Technology - Richard Gowen, President**

The role of the South Dakota School of Mines and Technology is that of a university specializing in undergraduate and graduate education emphasizing science and engineering. Degrees are authorized at the baccalaureate, master's, and doctoral levels.

**South Dakota State University – Peggy Gordon Elliott, President**

The central mission of South Dakota State University is to serve through teaching, research, and extension activities, as the state's land grant institution. The university's mission is undergraduate and graduate education from the freshman to the doctoral levels. This priority is achieved through selected high quality academic, professional, extra-curricular, and recreational programs. The second mission is to conduct nationally competitive strategic research, scholarly and creative activities. The third mission is the transfer of knowledge, especially to the citizens of South Dakota, through the Cooperative Extension Service and other entities.

**University of South Dakota - James Abbott, President**

The University of South Dakota is the comprehensive university within the South Dakota System of Higher Education. The University's mission is to provide graduate and undergraduate programs in the liberal arts and sciences and in professional education; to promote excellence in teaching and learning; to support research, scholarly, and creative activities; and to provide service to the State of South Dakota.

**South Dakota School for the Deaf - Jon Green, Superintendent**

The role and mission of the South Dakota School for the Deaf is to provide statewide services to the sensory impaired children and the youth of the State of South Dakota and to serve in a dual leadership and resource role in the statewide efforts to meet the educational needs of sensory impaired children from birth through age twenty-one. This mission will be carried out through cooperative efforts with all appropriate agencies, and colleges and universities. It is recognized that the mission of the South Dakota School for the Deaf is a significant part of the continuum of services in the statewide delivery system for children in need of special education or special education and related services.

**South Dakota School for the Blind and Visually Impaired - Marjorie Kaiser, Superintendent**

The role and mission of the South Dakota School for the Blind and Visually Impaired is to provide statewide services to meet the educational needs of children with sensory impairments from birth through age twenty-one in South Dakota by serving in a dual leadership and resource role in the statewide effort to serve these students. This mission will be carried out through cooperative efforts with all appropriate state agencies, educational cooperatives, local education agencies, and colleges and universities. It is recognized that the mission of the South Dakota School for the Blind and Visually Impaired is a significant part of the continuum of services in the statewide delivery system for children in need of special education or special education and related services.

### Minimum Requirements\*

All baccalaureate or general studies students under twenty-one (21) years of age, including students transferring with fewer than twenty-four (24) credit hours, must meet the following minimum course requirements with at least a "C" average:

1. **Four years of English - courses with major emphasis upon grammar, composition, or literary analysis; one year of debate instruction may be included to meet this requirement.**
2. **Three years of advanced mathematics - algebra, geometry, trigonometry or other advanced mathematics including accelerated or honors mathematics (algebra) provided at the 8<sup>th</sup> grade level; not included are arithmetic, business mathematics, general mathematics or other similar courses.**
3. **Three years of laboratory science - courses in biology, chemistry, or physics in which at least one (1) regular laboratory period is scheduled each week. Accelerated or honors science (biology, physics or chemistry) provided in the 8<sup>th</sup> grade shall be accepted. Qualifying physical science courses (with lab) will be decided on a case-by-case basis.**
4. **Three years of social science - history, economics, sociology, geography, government—including U.S. and South Dakota, American Problems, etc.**
5. **Demonstrated computer skills - basic keyboarding skills and experience using Internet or other wide area network.**
6. **One-half year of fine arts – art, theater, or music appreciation, analysis or performance.**

Students who have not completed the minimum course requirements may demonstrate equivalent competency by attaining the following ACT (American College Testing) or Advanced Placement Examination scores:

English: ACT English sub-test score of 17 or above OR AP Language/Composition or Literature/Composition score of 3 or above.

Mathematics: ACT Mathematics sub-test score of 17 or above OR AP Calculus AB or Calculus BC score of 3 or above.

Science: ACT Science sub-test score of 17 or above OR AP Biology, Chemistry, Physics B, or Physics C score of 3 or above.

Social Science: ACT Social Studies/Reading sub-test score of 17 or above OR AP Microeconomics, Macroeconomics, Comparative or United States Government

and Politics, European or United States History, or Psychology score of 3 or above.

Computer Science: AP Computer Science A or AB score of 3 or above.

Fine Arts: AP History of Art, Studio Art 9 drawing or general portfolio or Music Theory score of 3 or above.

In addition, students must meet at least ONE of the following criteria to be granted admission:

1. **ACT (American College Testing) composite score of 18 or above.**
2. **Rank in the top 60% of high school graduating class.**
3. **High school grade point average (GPA) of at least 2.6 on a 4.0 scale.**

### Mathematics and English Placement

All in-coming freshmen will take mathematics and English placement Examinations.

### Exception Group

Each university may admit a group of students, limited in size to 3% of the previous year's freshmen class, at the discretion of the university.

### Transfers to Baccalaureate Program

Students under twenty-one (21) years of age transferring into baccalaureate degree programs with fewer than 24 transfer credit hours must meet baccalaureate degree admissions requirements. Students with 24 or more transfer credit hours with a GPA of at least 2.0 may transfer at the discretion of the university.

### Non-Traditional Students

Non-traditional students (21 years of age or older) shall meet admissions requirements established by individual universities.

### One-Year Certificate and Two-Year Associate Degree Programs

Students seeking admission to certificate and associate degree programs shall meet baccalaureate admissions requirements or demonstrate equivalency as provided above.

\*The minimum requirements listed for admissions are condensed from actual Board Policy.
